Description

Provide a mechanism to allow a user to have specific settings associated with them. This will supersede the current SETTINGS hash and allow overriding on a per user, per-model basis.

The idea is that there is a per_page setting at the system level, a per_page setting at the model level for each user and this should also allow for saving things like the user's search history and preferences.

switches global setting var to be a constant var - refs #100

Revision 76607ed5 - 06/29/2011 02:17 PM - Ohad Levy

fixes #100 - Setting is now a ActiveRecord object

This allows users to manage foreman settings via the UI.

the UI is a bit ugly, but works :)

Revision 29eebabc - 07/03/2011 09:30 AM - Ohad Levy

splitted setting default data from the migration
this allows to add new data and modify its defaults
improved settings UI a bit more
