Description

Hi,

When we try to create new compute profile in foreman GUI, it displays different memory option in drop down list on the basis of language selected in profile.

I checked for Deutsch and English.

It should give same options for all display.

Thanks
Aditya

Which type of compute resource are you using? (Libvirt, VMware etc)

What different memory options do you see? Screenshots would be great if could attach them.

Hello Dominic,

Thanks for response.

We are using Libvirt compute resource.

Please find attached screenshots for English & Deutsche language.

You can see different options in drop down menu.

Thanks,
Aditya

How strange! I found the cause though, it comes from the localisation files that we include for Rails. We can't just change ours else they'll revert, but this has been fixed in the upstream project and will be fixed when we move to Rails 4.

https://github.com/svenfuchs/rails-i18n/commit/c757651a692f1f632a1da25d061bf4d53042ebf3

- Status changed from New to Closed

- % Done changed from 0 to 100

- translation missing: en.field_release set to 71

This should be fixed with the update to Rails 4 and a newer rails-i18n gem.
