

Smart Proxy - Bug #1004

puppetca is depreciated in puppet 2.6

06/22/2011 06:15 PM - Corey Osman

Status:	Closed	
Priority:	Normal	
Assignee:	Corey Osman	
Category:	Puppet	
Target version:	0.3	
Difficulty:		Fixed in Releases:
Triaged:		Found in Releases:

Pull request:		
Description		
puppet 2.6 now uses "puppet cert" instead of puppetca. They have made wrappers to work around compatible issues but smart-proxy may not know where to look for this if using puppet enterprise.		
The code will need to also look for puppet cert if puppetca does not exist

I made some code modifications and I'll submit a patch soon. Here is the output of the updated code that looks for puppet or puppetca.

```
D, [2011-06-22T17:27:58.799695 #9207] DEBUG -- : Found puppetca at /opt/puppet/bin/puppet
D, [2011-06-22T17:27:58.799834 #9207] DEBUG -- : Found sudo at /usr/bin/sudo
D, [2011-06-22T17:27:58.799892 #9207] DEBUG -- : Executing /usr/bin/sudo -S /opt/puppet/bin/puppet cert --list --all
D, [2011-06-22T17:56:41.440743 #10433] DEBUG -- : Found puppetca at /opt/puppet/bin/puppet cert
