

Foreman - Bug #10094

Wrong VMware interface informations when attaching existing vm to foreman

04/08/2015 10:29 AM - Alexandre Barth

Status: Duplicate	
Priority: Normal	
Assignee:	
Category:	
Target version:	
Difficulty:	Fixed in Releases:
Triaged:	Found in Releases:
Bugzilla link:	Red Hat JIRA:
Pull request:	
Description	
If i attach an existing vmware vm to foreman, NIC type and network are always the first from the list while Vms created from foreman display the expected NIC type and network.	
Related issues:	
Is duplicate of Foreman - Bug #6303: Hosts display wrong vmware networks	New

#2 - 04/08/2015 10:31 AM - Dominic Cleal

- Status changed from New to Duplicate

Thanks for the report Alexandre, but I think [#6303](#) covers this already.

#3 - 04/08/2015 11:02 AM - Alexandre Barth

Oops, sorry, i forgot i had already opened an issue about this ... but how can i know this is still in your todo list ? (as 6303 issue was last updated months ago)

It needs somebody with a familiarity with VMware I'm afraid, which isn't me. The project really needs some developers who are able to tackle these bug reports.
