Pull request:			

Description

If I click on "Import new puppet classes and environments" at the **Puppet Classes** page and foreman doesn't find the modules-directory it doesn't print an error-message.

If I do the same on the **Environments** page it does show an error ("Unable to find directory ... in environment ...")

Can you try this patch?

```
diff --git a/app/controllers/puppetclasses_controller.rb b/app/controllers/puppetclasses_controller.rb
index 746b382..3b41947 100644
--- a/app/controllers/puppetclasses_controller.rb
+++ b/app/controllers/puppetclasses_controller.rb
@@ -7,7 +7,6 @@ class PuppetclassesController < ApplicationController
   def index
     begin
       values = Puppetclass.search_for(params[:search], :order => params[:order])
-      flash.clear
     rescue => e
       error e.to_s
       values = Puppetclass.search_for ""
```

#2 - 06/24/2011 07:42 AM - Alexander Rusa

I deleted the "flash.clear" and now it shows the error correctly but i didn't manage to apply the patch by using git apply - maybe this is because I haven't got enough practice with git patches ;-)

```
$ git apply --check <patch>
error: patch failed: app/controllers/puppetclasses_controller.rb:7
error: app/controllers/puppetclasses_controller.rb: patch does not apply
```

- *Category set to Web Interface*

- *Target version set to 0.4*

naa.. it wasnt a proper git patch.

I'll add it to the repo officially, so you would simply get it with a git pull.

you would probably need to do git checkout app/controllers/puppetclasses_controller.rb first (so git could apply the patch).
