Description	
If we defined two environment in puppet, when editing an hostgroup the classes of both environment are displayed.	

History

#1 - 07/11/2011 03:28 AM - Ohad Levy

- Status changed from *New* to *Feedback*

just to clarify, you mean that if you already had puppet classes assigned to a host when changing to an environment which does not include those puppet classes, they remain in the list?

#2 - 07/31/2011 07:54 AM - Ohad Levy

- Status changed from *Feedback* to *Need more information*

#3 - 11/15/2012 06:26 AM - Benjamin Papillon

- Status changed from *Need more information* to *Assigned*

- Assignee set to *Romain Vrignaud*

I can't reproduce it in last dev package. But Romain can so I assign the bug to him for more tests.

#4 - 11/15/2012 11:19 AM - Romain Vrignaud

- Status changed from *Assigned* to *Closed*

- Target version set to *Bug scrub*

Was fixed between 1.0.1 and develop.

I close the issue.
