Could you provide a bit more of the production.log showing the full request please, and the URL shown in your browser? Seems like the space is getting misinterpreted, as it works OK here.

I am seeing this issue in Satellite 6.1 also.

If I start at a Katello page. eg. Content -> Products (<https://FQDN/products>)  
This url is used when I click on Monitor -> Reports

<https://FQDN/reports?search=eventful%2B%3D%2Btrue>

If I start at a Forman page. eg. Monitor -> Dashboard (<https://FQDN/dashboard>)  
This url is used when I click on Monitor -> Reports

<https://FQDN/reports?search=eventful+%3D+true>

This problem seems to still exist in Foremen 1.10.2. It isn't consistent, as can be seen in the log snippets below. Note the different URI between the two identical mouse clicks.
