#### Description

Attempt to create second primary or provision interface via API fails correctly but returns wrong messages:

Primary host already has provision interface  
Provision host already has provision interface

```
422 Unprocessable Entity
{
  "error" => {
    "id" => 15,
    "errors" => {
      "interfaces.primary" => [
        [0] "host already has primary interface"
      ],
      "interfaces.name" => [
        [0] "has already been taken"
      ],
      "interfaces.provision" => [
        [0] "host already has provision interface"
      ],
      "interfaces.mac" => [
        [0] "can't be blank"
      ]
    ],
    "full_messages" => [
      [0] "Primary host already has primary interface",
      [1] "Name has already been taken",
      [2] "Provision host already has provision interface",
      [3] "Mac can't be blank"
    ]
  }
}
```

As the returned hash demonstrates, it is probably caused by wrong Rails' synthesis into full messages.
