

Smart Proxy - Bug #10239

foreman-prepare-realm should fail better

04/22/2015 11:05 AM - Stephen Benjamin

Description	
If there's errors in the ipa commands, we still display the keytab and stuff at the end, so the errors aren't obvious.	
More than one person tried foreman-prepare-realm from 1.7 against freeipa 4 and didn't notice the errors.
