

## Foreman - Bug #10247

### Hostname tooltip are truncated

04/23/2015 03:50 AM - Jérôme Vizcaino

<b>Status:</b> Resolved	
<b>Priority:</b> Normal	
<b>Assignee:</b>	
<b>Category:</b> Web Interface	
<b>Target version:</b> 1.9.0	
<b>Difficulty:</b>	<b>Fixed in Releases:</b>
<b>Triaged:</b>	<b>Found in Releases:</b> 1.7.0
<b>Bugzilla link:</b>	<b>Red Hat JIRA:</b>
<b>Pull request:</b>	
<b>Description</b>	
Howto reproduce :	
<ul style="list-style-type: none"><li>• create a host with a long FQDN (30+ chars)</li><li>• goto to 'All hosts' page</li><li>• full hostname is truncated and hovering with mouse renders a tooltip</li><li>• tooltip truncates the displayed FQND</li></ul>	
Bug is related to <a href="#">#2879</a>	
Looking at different results, it seems the tooltip width (or max-width) is hardcoded, therefore not adapting to the actual text width.

It would be nice, if it would be possible to set a default max-size for the trunc\_with\_tooltip function in the settings section of the foreman web-ui to override the default of 32 characters. Thus it would render the hardcoded values in the HTML templates superfluous.

Otherwise the size could be made dependent on the width of the column. Usually there is lots of usable space left in the rows.

#### #3 - 08/16/2015 10:27 AM - Tomer Brisker

- Status changed from New to Resolved

- translation missing: en.field\_release set to 35

This is fixed for 1.9. Fixed by the PR for [#8861](#).

Please reopen if occurs again with Foreman >= 1.9.
