

Foreman - Bug #10248

When cloning virtual machine from existing machine - Network Interface and Storage details are not propagated.

04/23/2015 04:25 AM - Tomáš Strachota

Status: Closed	
Priority: Normal	
Assignee: Tomáš Strachota	
Category: Compute resources	
Target version: 1.10.0	
Difficulty:	Fixed in Releases:
Triaged:	Found in Releases:
Bugzilla link: 1200083	Red Hat JIRA:
Pull request: https://github.com/theforeman/foreman/pull/2380	
Description	
Cloned from https://bugzilla.redhat.com/show_bug.cgi?id=1200083	
Description of problem: Customer attempts to clone VM in the Setellite6 WebUI. Most of the settings are copied from original VM while Network interface and Storage information are default one.	
Version-Release number of selected component (if applicable):	
How reproducible:	
Steps to Reproduce: 1. In Sat6 clone machine from existing host	
Actual results: If source host has different Network and Storage settings to VMWare template then new host gets default Network and Storage settings from template	
Expected results: New host must get settings from cloned host rather than from VMware template
