Pull request: https://github.com/theforeman/puppet-for-eman_proxy/pull/167	
Description As discussed with mmoll on IRC. I have a hypervisor running on Debian Jessie + Proxy , TFTP, DHCP, libvirt, KVM I'm not able to boot a Debian 8 Guest installation. It seems like we need to put the following file into FTP root: <code>/usr/lib/syslinux/modules/bios/ldlinux.c32</code> There is also one for EFI... <code>syslinux 3:6.03+dfsg-5</code> !Screenshot from 2015-04-23 19:17:02.png!

Fixes #10255 - syslinux 6.x also needs ldlinux.c32

Revision 0409916c - 05/15/2015 10:55 PM - Michael Moll

refs #10255 - syslinux 6.x also needs libutil.c32

for menu.c32 to really work
