<b>Description</b>	
Unmanaged hosts form currently does not expose interfaces tab. We should allow full management of interfaces even for unmanaged hosts, interfaces are storage of network related attributes (e.g. IP)

Without this users can't delete interfaces from UI that after migration from 1.7 might be invalid. The only way to fix invalid interfaces would be through API. I think this should be part of 1.8.2. Feel free to reset Release if you disagree.
