Pull request:			

Description

When enabling the smart proxy template module and trying to perform the "/unattended/built" call the smart proxy returns a 500 error.

Here is the smart proxy listing is features and the error.
[root@sp1 foreman-proxy]# curl --insecure -XGET https://sp1.lab.local:8443/features
["dhcp","dns","templates","tftp"]
[root@sp1 foreman-proxy]# curl --insecure -XGET http://sp1.lab.local:8000/features
["dhcp","dns","templates","tftp"]
Failed to retrieve built tcurl --insecure -XGET http://sp1.lab.local:8000/unattended/built
Failed to retrieve built template for : undefined method `encoding' for nil:NilClass
[root@sp1 foreman-proxy]# curl --insecure -XGET https://sp1.lab.local:8443/unattended/built
Failed to retrieve built template for : undefined method `encoding' for nil:NilClass

proxy.log

History

#1 - 04/24/2015 08:30 AM - Dominic Cleal

- Is duplicate of Bug #10256: GET on SmartProxy 'unattended/built' throwing error 500 added

#2 - 04/24/2015 08:32 AM - Dominic Cleal

- Status changed from New to Duplicate

Thanks for the report and extra data - we're tracking this under ticket [#10256](#) for 1.8.

#3 - 04/24/2015 08:33 AM - Dominic Cleal

Oh, I forgot to add - if you're able to set the log_level to DEBUG in the smart proxy's configuration file and re-test, it'd be much appreciated. It should then log a stack trace - see the linked ticket.

#4 - 04/24/2015 08:40 AM - Anonymous

Might be useful to get log from the foreman side too.
