Foreman - Bug #10278

New Hosts deployed on oVirt/RHEV have names with domain dots/periods replaced with hyphens (i.e. foo-bar-com)

Description

New Hosts deployed on oVirt/RHEV via Foreman are given names with the period/dot (.) in the domain name replaced with hyphens.

For instance, a "New Host" deployed on oVirt/RHEV with a given name of "foo" using "Domain" of "bar.com" appears on oVirt/RHEV with the name of "foo-bar-com".
This should be "foo.bar.com".

This may be due to a early limitation within oVirt/RHEV that disallowed period/dots in VM names, but this limitation was removed some versions ago.

Thank You

Revision cf826485 - 04/12/2016 08:20 AM - Ivan Necas

Fixes #10278 - don't replace . with - for oVirt VM anymore

The version that supports . in VM names (v3.1.0-18) has been around
for almost 4 years
now (https://github.com/oVirt/ovirt-engine/commit/540a75e0f7bc4b9ed879471d3d830d575c6d6060).

Time to move one and make the VM names in oVirt a bit nicer now.

Thank You Dominic.
Just for ref, the limitation was removed from oVirt/RHEV in v3.1.0-18

Cheers
