- Target version deleted (0.4)

due to a few open issue with rails, this will need to be done after the rails 3 upgrade.

#3 - 01/19/2012 10:40 AM - Ohad Levy

- Target version set to 1.0

lets try to get something out for 0.5

My proposal :

From the host group have the ability to add parameters with these fields :

- name
- description
- default value
- read only
- mandatory
- validator (regex)

When you edit a host, you can see all the parameters defined in the host group (or its parents), you can edit the value of a parameter (if it's not in read only) or even delete it if it's not mandatory, foreman use the validator to check that the value is correct and show a message if not
