Description		
<p>Hello!</p> <p>I found Bug in new Foreman 1.8.0.</p> <p>When I create the compute profile and fill the field "Template". I can choose template from the compute resource, but it does not load information about network interface and volumes (only loads information about cores and memory).</p> <p>The same problem with the creation of the VM.</p> <p>You can look at the screenshot, opposite field "Template", you can see the download icon, it never disappears.</p> <p>Thaks.</p>

- Category set to Compute resources - oVirt

- Priority changed from High to Normal

Could you tail -f /var/log/foreman/production.log as you select the template please and attach any logs that it makes while this runs? It might be best if you can enable debugging first: <http://projects.theforeman.org/projects/foreman/wiki/Troubleshooting#How-do-I-enable-debugging>

When the icon (opposite field "Template") appears, the log is no longer any.

I have the same issue with Ovirt 3.5 & Foreman 1.8.2.

If I've defined an image under compute resource then it will be listed in the Image dropdown, but grayed out.

If I have more than one image under compute resource then the image dropdown will say "Please select an Image" but it is still grayed out.

In either case the little progress indicator beside the Template field never stops spinning.

Lastly when I create a new host using Operating System -> Provisioning Method -> "Image Based" the image dropdown is empty, leading to no volume being created on the VM in Ovirt.
