Description

Several prospect clients keep pointing the issue of not having "customizable" charts base on Host Facts.
A nice feature would be to be able to edit the Statistics page and add different "Statistics Template" to analize through different POVs the company state.

(Is there a way to provide this functionality thorugh chopping and editing the ROR site?)

#3 - 05/05/2015 03:59 AM - Dominic Cleal

- Status changed from New to Duplicate

Thanks for the report, I believe this is what Tomer is planning to address in #7503 in the dashboard.
