Pull request:	https://github.com/theforeman/foreman/pull/2629		

Description

After update to 1.8, when i check host checkbox in all hosts lists, and execute action via select action/assign organization for example, after action complete the checkbox unchecks again. Before, the checkboxes were "sticky" and remained across actions, which is really helpfull - for example when assigning organization/location and then changing group to multi hosts, it makes sense to leave checkboxes on for them so you dont have to checkbox them again. Its what i would expect to be correct behavior, and i think its why the checkboxes are there for in first place.
But, we have also bug #6655 which caused the change in 1.8 in first place, so it has to be weighted what best final state of this would be.
