

Foreman - Bug #10535

Tokens are created for managed hosts after validation

05/18/2015 10:27 AM - Ori Rabin

Status:	Closed		
Priority:	Normal		
Assignee:	Ori Rabin		
Category:	Host creation		
Target version:	1.8.2		
Difficulty:			
Triaged:			
Bugzilla link:			
Pull request:	https://github.com/foreman/foreman/pull/2390	Fixed in Releases:	
Description		Found in Releases:	
set_token is called for managed host after validations and not after save. This can't be moved to after_save since the token is needed before save for templates. The result is a token can be created for a host that eventually isn't saved as a managed host. I only reproduced this with discovery: http://projects.theforeman.org/issues/9597 when provisioning a discovered host, trying to save causes validations and then a token was created. As a result after canceling there was a token connected to a discovered host.		Red Hat JIRA:

If this bug is planned to be backported into 1.8, we need to make sure that Discovery migration is copied over into Foreman core. See the PR discussion for more info.

#3 - 05/20/2015 02:15 AM - Dominic Cleal

- Category set to Host creation
- translation missing: en.field_release set to 35
