6 Assign role **testuser** to some LDAP user(local not checked)
7 Login as LDAP user
8 change **test_param**=sdafsa, add parameter **test_param2**=000
9 Press Submit
10 Check Audits - some like

~~User IP~~ created Hostgroup : test_param2 / test_classes
~~User IP~~ updated Hostgroup : test_param / test_classes
~~User IP~~ removed Hostgroup Class: 681 / test_classes
Removed test_classes from test_classes

11 Check host group classes - is empty now.
No more classes assigned to this group.

- Category set to Users, Roles and Permissions

Untested, but sounds like it's when the user's missing the edit_classes permission.
