

## Foreman - Feature #10661

### Audit puppetruns through the UI

06/01/2015 08:00 AM - Petter Hassberg

<b>Status:</b> New	
<b>Priority:</b> Normal	
<b>Assignee:</b>	
<b>Category:</b> Audit Log	
<b>Target version:</b>	
<b>Difficulty:</b>	<b>Fixed in Releases:</b>
<b>Triaged:</b>	<b>Found in Releases:</b>
<b>Bugzilla link:</b>	<b>Red Hat JIRA:</b>
<b>Pull request:</b>	
<b>Description</b> It would be great if the puppetruns triggered through the foreman UI were auditable. That way you could see who triggered a puppet run, and when one was run.

We also feel this would be important info. I asked about it yesterday on IRC channel, and got a pointer where to start:

"<Dominic> ikkeT: probably add an Audit.create! call into the Host::Managed#puppetrun method to create a new audit record in the DB, though I don't think we have an example anywhere as usually audits aren't generated like that"
