

## Foreman - Bug #10687

### Max CPU count for compute profile is 8

06/03/2015 07:31 AM - Jon Skarpeteig

<b>Status:</b> Duplicate

<b>Pull request:</b>	
<b>Description</b>	
There shouldn't be a fixed max CPU count, but rather derived from the actual endpoint (or just freetext). Currently the max for VMware is set to CPU count = 8. This is incorrect, and should be allowed to set higher.	
VMware actually recommends using 1 core per socket, regardless of amount of CPU. This is due to NUMA optimization done by the hypervisor.
