| <b>Pull request:</b> <a href="https://github.com/foreman/foreman/pull/2430">https://github.com/foreman/foreman/pull/2430</a>  |                                   |
| <b>Description</b>  |                                   |
| Steps to Reproduce:<br>1. foreman-debug -g -v -a -d /tmp/test<br>2. View results  |                                   |
| Actual results:<br>A debug directory has been created: /tmp/test  |                                   |
| You may want to upload the tarball to our public server via rsync. There is a write only directory (readable only by Foreman core developers) for that. Note the rsync transmission is UNENCRYPTED: |                                   |
| <pre>rsync /tmp/test.tar.xz rsync://theforeman.org/debug-incoming</pre>   |                                   |
| Do you want to do this now? [y/N] y<br>Uploading...   |                                   |
| rsync: link_stat "/tmp/test.tar.xz" failed: No such file or directory (2)   |                                   |
