Foreman - Bug #10739

Remove GET variant of API route for building default PXE menu

06/09/2015 09:19 AM - Tomáš Strachota

Pull request:			

Description

We previously used GET method for /api/config_templates/build_pxe_default/ which did not align with REST rules as the call modifies data. Issue [#6976](#) fixed the problem and added POST version of the API call but kept the GET method for backward compatibility.

We should remove the GET legacy in one of future releases.
