Revision 75e3743d - 07/02/2015 05:03 PM - Eric Helms

Fixes #10803: Return nil if no resource_type when creating a filter.

In some instances, such as during DB seed, when a filter is being created for the first time the before_validation callback to build_taxonomy_search is triggered. Since, the filter hasn't been saved, there are no permissions connected to the filter yet when the 'permissions.first.try(:resource_type)' call is made generating the resource_type. This in turn leads get_resource_class to call constantize on 'nil' and throw an exception which then appears throughout the db:seed log.
