Pull request:	
Description	
<p>In app/model/host.rb on line 185 (inside the built function) i just had the problem, that "self.save" didn't work, because there was a validation error.</p> <p>But at this point I don't get the error-message that there is a validation-error, it just says "Failed to cancel pending build for..." (the error comes from HostsController).</p> <p>Maybe there is a way to catch this error and print it to the user!</p>

- Status changed from New to Feedback

I think this has been solved correctly, as now we should be writing back the actual errors.

Do you still see this issue with 0.4+ ?

- Target version set to Bug scrub

Hello,

Due to lack of update we are closing this bug.
Please, reopen it if you still have the problem with newer builds.
