

## Foreman - Feature #10833

### Turn smart class parameters and smart variables to STI

06/16/2015 08:45 AM - Ori Rabin

<b>Pull request:</b>	
<b>Description</b> Lookup keys used to be almost identical between smart class parameters and smart variables. Now with the use_puppet_default fields on keys and variables in addition to the minor differences that already existed they are becoming too different to keep combined. There are already a few changes that check is_param, smart_variable? and there are expected to be more.
