Associated revisions

Revision 133825c7 - 09/11/2015 03:27 AM - Daniel Lobato Garcia

Fixes #10897 - Fedora/RHEL Atomic kickstart and PXE

New templates to allow Atomic provisioning through kickstart and PXE.
The original PXELinux template has been modified to accept the --repo
parameter when the name of the OS matches Atomic. Kickstart fetches
ostree from the installation media dynamically finding the --ref from
the OS version in Foreman.

Closes GH-190
