

## Foreman - Refactor #10946

### User mail address should either be always optional or always required

06/29/2015 07:32 AM - Dominic Cleal

<b>Description</b>	
The design of forcing a user to set their e-mail address on login should perhaps change to have the e-mail address as an optional field and not force anybody to set it - or have it required, but that'd introduce issues with certain auth sources.	
This would eliminate the inconsistency between admins and the users themselves evident in <a href="#">#5897</a> .
