Revision dcc3a96f - 07/08/2015 06:23 AM - Eric Helms

Fixes #11025: Allow skip test runner to run through Jenkins test task.

The Jenkins CI gem implements its own custom test runner. When trying to use a custom test runner in the jenkins environment, this test runner needs to be inherited from and included as the last argument. In order to do this, a new task that adds our test runner is executed before each test task so that the custom test runner is always the last argument and wins over the base Jenkins runner.

The interface for users calling this test tasks should remain the same, only the output (and ability to run the custom test runner in Jenkins) should change.

History

#1 - 07/06/2015 10:30 AM - Dominic Cleal

- Category set to Tests
- Status changed from New to Ready For Testing
