Foreman - Bug #11031

Cannot remove interface with duplicate name

07/07/2015 07:39 AM - Jérôme Vizcaino

Status:	Closed		
Priority:	Normal		
Assignee:	Marek Hulán		
Category:	Network		
Target version:	1.8.4		
Difficulty:		**Fixed in Releases:**	
Triaged:		**Found in Releases:**	1.8.2
Bugzilla link:		**Red Hat JIRA:**	
Pull request:	https://github.com/theforeman/foreman/pull/2627		

Description

Somehow, after migrating from foreman 1.7.4 to 1.8.2, duplicate interfaces appeared (especially on hosts with virtual nics and bridges).

Trying to remove duplicate interfaces simply does not work.

Howto reproduce:

- locate a host with duplicated interfaces (two br0 for example)
- try to remove one of the 'br0'
- submit
- application complains that one of the 'br0' are invalid

Can you share the log from when you submit the form, and/or what the errors are (if shown) on the individual interfaces?

FWIW, I wasn't able to see any errors in the logs when I was having this problem. I'll admit, though, I'm not sure which logs I should be checking. In my instance, I was looking at the foreman production.log in /var/log/foreman as well as the logs in /var/log/foreman-proxy.
