

## Smart Proxy - Bug #1105

### multiple puppetca or puppet enterprise puppet cause smart-proxy to fail

08/11/2011 03:37 AM - Corey Osman

<b>Status:</b> Closed

<b>Description</b>	
I have /usr/bin/puppetca and I have /opt/puppet/bin/puppet. Both are supposed to list the puppet certificates. However, since I am using puppet enterprise foreman needs to use /opt/puppet/bin/puppet cert. Furthermore, I think foreman should test each match to see which puppet or puppetca works.	

#### History

This will cause kickstarts to not process and leave the user with a OS to configure manually.

```
