Revision c6fcfc9c - 07/09/2015 07:32 AM - Eric Helms

Fixes #11056: Configure base SETTINGS for test environment.

This change introduces the idea of having a base configuration for SETTINGS within the test environment. This is captured in the settings.yaml.test file. To be able to detect the Rails environment in settings.rb, the ordering had to be changed whereby the Gemfile is loaded up via boot.rb and then Rails is required so that the Rails environment is available by the time settings.rb is processed.
