Foreman - Bug #1115

Host parameters are not available via the API

08/17/2011 08:04 AM - Matt Moran

Status:	Closed

Pull request:			

Description

If a host has parameters, these are not available/editable via the API.

i.e.
curl -H "Content-Type:application/json" -H "Accept:application/json" http://foreman:3000/hosts/FQDN

Does not return the hosts parameters. The parameters that should be returned are host level and not ones that are inherited from a group or domain etc.
