Smart Proxy - Bug #1117

Permissions issue with RHEL package

08/17/2011 01:23 PM - Ashley Penney

Pull request:			

Description

On RHEL the permissions for /var/lib/puppet/ssl/ca/inventory.txt require the foreman-proxy user to be part of the puppet group - otherwise it cannot see this file and constantly errors out.

History

#1 - 09/28/2011 05:20 PM - Benjamin Papillon

On Fedora 15 there is the same problem. (except path is /etc/puppet/ssl/ca)

Other issues in the same register :
- /etc/dhcp/dhcpd.conf is not accessible by default foreman-proxy user (note path is not /etc/dhcpd.conf)
- /etc/rndc.key is not accessible either

#2 - 09/29/2011 12:22 PM - Ohad Levy

does adding foreman-proxy to the puppet group solves the issue?

#3 - 09/30/2011 03:30 AM - Benjamin Papillon

for /etc/puppet/ssl/ca it should work. As it's a test machine I've been more direct, I changed foreman-proxy user to puppet group ;)

For the other 2, I added a+r. It's definitively wrong for prod. use, but for tests it's ok. Changing group is one way. Another could be sudo /bin/cat ...

Either way, I'd like smart-proxy logs told me it's a permission error and not "file not found" =)

#4 - 01/15/2012 09:53 AM - Ohad Levy

would you guys mind adding those extra issues? its hard to track all of the different bugs in one ticket :)

#5 - 08/28/2012 04:28 AM - Ohad Levy

- Status changed from New to Need more information

is still applicable with the latest 1.x packages?

#6 - 08/30/2012 09:40 AM - Benjamin Papillon

I think we discussed it with jmontleon and he already added foreman-proxy user to puppet group. I didn't check.
Good rights for dhcpd.conf are specified in the wiki.

The issue specified by the opener can be closed. The issues I reported as bad log information should be in another ticket, definitively not this one.

I think we can close the bug. Let's wait few days for the opener some ppl are still in vacation ;)

#7 - 11/13/2012 11:41 AM - Greg Sutcliffe

- Status changed from Need more information to Closed

Closing.
