Foreman - Refactor #11208

Simplecov should be opt-in

Description

Simplecov is taking up some time to generate test coverage documentation that does not need to be recreated after every test run. Now it runs after every time we run tests, but it could possibly just run when we pass an argument --simplecov. This should slightly relieve Jenkins infra usage.

- Status changed from New to Rejected

Rejecting for now as it's been removed entirely via [#14191](#). I'm open to this being an opt-in feature still though.
