Triaged:	Found in Releases:
Bugzilla link:	Red Hat JIRA:
Pull request:	
Description	
<p>/config_templates?format=json returns too much data. I simply want a list of templates and some attributes instead of the code thats inside the templates. If I want the code inside the template it would be better to pass the name of a template or id like:</p> <p>config_templates/grubby?format=json</p> <p>Here is a sample of what gets returned now:</p> <pre>[{"config_template":{"name":"Grubby Default","template":"#!/bin/bash\n\nKERNEL=\"/boot/kernel\"\nINITRD=\"/boot/initrd.img\"\n\nnwget -O \"\$KERNEL\" \"<%= @host.url_for_boot(:kernel) %>\"\n\nnwget -O \"\$INITRD\" \"<%= @host.url_for_boot(:initrd) %>\"\n\ngrubby --add-kernel=\$KERNEL --initrd=\$INITRD --copy-default --title \"<%= @host.operatingsystem %>\" --make-default --args=\"ks=<%= foreman_url(\"provision\") %>\"\n\n","snippet":null}}, {"config_template":{"name":"HTTP proxy","template":"<% if proxy = @host.params[\"http_proxy\"] -%>\n\nhttp_proxy=<%= proxy %>\n\nexport http_proxy\n\nhttps_proxy=<%= proxy %>\n\nexport https_proxy\n\nno_proxy=localhost,127.0.0.0/8,*.*.*.*\n\n<%= @host.domain.name -%>\n\npuppet\n\nexport no_proxy\n\n<% end -%>\n\n","snippet":true}}, {"config_template":{"name":"Jumpstart Default","template":"install_type <%= @install_type %>\n\npartitioning explicit\n\n<%= @disk %>\n\n<% if @h</pre>
