

Foreman - Bug #11231

Period character in parameters causes 406 error

07/28/2015 07:43 AM - James Eckersall

Status: Closed	
Priority: Normal	
Assignee: Tomer Brisker	
Category: Web Interface	
Target version: 1.9.1	
Difficulty:	Fixed in Releases:
Triaged:	Found in Releases:
Bugzilla link: 1247798	Red Hat JIRA:
Pull request: https://github.com/foreman/foreman/pull/2583	
Description	
<p>If you create a global parameter with a period character, you are then unable to modify or delete it. I haven't tested this with host-group or host-level parameters, but I suspect the behaviour will be the same.</p> <p>For example, I created a global param called "net.ifnames". When I try to edit it:</p> <pre>Started GET "/common_parameters/net.ifnames/edit" for 10.x.x.x at 2015-07-28 10:16:30 +0100 2015-07-28 10:16:30 [F] ActionController::RoutingError (No route matches [GET] "/common_parameters/net.ifnames/edit"): /usr/share/gems/gems/passenger-4.0.18/lib/phusion_passenger/rack/thread_handler_extension.rb:77:in `process_request' /usr/share/gems/gems/passenger-4.0.18/lib/phusion_passenger/request_handler/thread_handler.rb:140:in `accept_and_process_next_request' /usr/share/gems/gems/passenger-4.0.18/lib/phusion_passenger/request_handler/thread_handler.rb:108:in `main_loop' /usr/share/gems/gems/passenger-4.0.18/lib/phusion_passenger/request_handler.rb:441:in `block (3 levels) in start_threads'</pre> <p>Trying to delete it:</p> <pre>Started DELETE "/common_parameters/net.ifnames" for 10.x.x.x at 2015-07-28 10:17:06 +0100 2015-07-28 10:17:06 [I] Processing by CommonParametersController#destroy as 2015-07-28 10:17:06 [I] Parameters: {"authenticity_token"=>"xxxx", "id"=>"net"} 2015-07-28 10:17:06 [I] Completed 406 Not Acceptable in 7ms (ActiveRecord: 1.1ms) 2015-07-28 10:17:21 [I]</pre> <p>I guess either the validation should be changed to prevent me from creating a variable with a period char in it, or the backend needs to handle params with a period in the name.</p>
