

Foreman - Bug #11283

Template form does not work with template which does not define operatingsystem association

08/04/2015 06:56 AM - Marek Hulán

Status: Closed	
Priority: Normal	
Assignee: Marek Hulán	
Category: Templates	
Target version: 1.10.0	
Difficulty:	Fixed in Releases:
Triaged:	Found in Releases:
Bugzilla link:	Red Hat JIRA:
Pull request: https://github.com/theforeman/foreman/pull/2591	
Description	
By coincidence, both template types that we have in core have operatingsystems association, so the form renders properly for them. Other templates that are added from plugins that do not have this association, therefore an error occurs when rendering the form. We should check whether the method is defined first. The breaking change was introduced in 1.10 by https://github.com/theforeman/foreman/commit/a377f776e51d6b046ad0d28a56d142777a51797
