Pull request: https://github.com/theforeman/foreman/pull/2595	
Description	
<p>I'm trying to manage creation of roles and their associated permissions. Haven't figured out how. This was as close as I could determine and it doesnt work.</p>	
<pre>hammer> filter create --role "Content Viewer" --permissions "view_gpg_keys,view_content_views" Could not create the permission filter: Permissions Permissions must be of same resource type</pre>	
<pre>hammer> filter update --organization-ids 1 --id 76 --role "Content Viewer" --permissions view_products Could not update the permission filter: Permissions Permissions must be of same resource type Organization ids You can't assign organizations to this resource</pre>	
<pre>hammer> filter update --organization-ids 1 --id 76 --role "Content Viewer" --permissions view_products -^t^t --help --location-ids --organization-ids --permission-ids --role --search --id --locations --organizations --permissions --role-id -h</pre>

Revision 2dec184c - 08/24/2015 08:42 AM - Eric Helms

Fixes #11303: Allow scoped search by name for permissions.

This both provides this functionality and fixes an issue with creating filters using hammer. Hammer attempts to search for a permission by name using scoped search syntax when creating a filter with the `--permission=view_domains` style syntax. However, this was defaulting to returning all permissions instead of scoped permissions.

History

#2 - 08/07/2015 10:07 AM - Eric Helms

After some investigation this appears to be an error with the expectation of hammer when providing a permission name to go and search the API for a permission with the name supplied by the user. However, permissions aren't currently outfitted for scoped search usage and thus all permissions are

returned and a filter is attempted to be created with them and thus the error mentioned is generated.
