Description		
Hi,		
I added a new class to common and when importing I get all the classes, even the ones I already have in katello.		
This is the trace:		
ActiveRecord::RecordInvalid		
Validation failed: Name has already been taken		
app/services/puppet_class_importer.rb:272:in `find_or_create_env'		
app/services/puppet_class_importer.rb:192:in `add_classes_to_foreman'		
app/services/puppet_class_importer.rb:59:in `block in obsolete_and_new'		
app/services/puppet_class_importer.rb:57:in `each'		
app/services/puppet_class_importer.rb:57:in `obsolete_and_new'		
app/controllers/concerns/foreman/controller/environments.rb:30:in `obsolete_and_new'		
app/controllers/concerns/application_shared.rb:13:in `set_timezone'		
app/models/concerns/foreman/thread_session.rb:32:in `clear_thread'		
lib/middleware/catch_json_parse_errors.rb:9:in `call'

#4 - 04/20/2016 02:54 AM - Dominic Cleal

- Is duplicate of Bug #10906: Puppet environment import returns 500 because it exists in different organization added

#5 - 04/20/2016 02:55 AM - Dominic Cleal

- Status changed from New to Duplicate

Thanks for the report, we're going to track this under ticket [#10906](#). This appears to be an issue with orgs/locs, where the existing environment isn't assigned to the org/loc that you're currently using - add it to the current org/loc and it should be OK, or perhaps try using Any Context.
