Bugzilla link:	Red Hat JIRA:
Pull request:	
Description	
Hi,	
I added a new class to common and when importing I get all the classes, even the ones I already have in katello. This is the trace:	
ActiveRecord::RecordInvalid Validation failed: Name has already been taken app/services/puppet_class_importer.rb:272:in `find_or_create_env' app/services/puppet_class_importer.rb:192:in `add_classes_to_foreman' app/services/puppet_class_importer.rb:59:in `block in obsolete_and_new' app/services/puppet_class_importer.rb:57:in `each' app/services/puppet_class_importer.rb:57:in `obsolete_and_new' app/controllers/concerns/foreman/controller/environments.rb:30:in `obsolete_and_new' app/controllers/concerns/application_shared.rb:13:in `set_timezone' app/models/concerns/foreman/thread_session.rb:32:in `clear_thread' lib/middleware/catch_json_parse_errors.rb:9:in `call'

History

#1 - 08/11/2015 10:29 AM - Dominic Cleal

- Subject changed from Error importing classes Katello 2.2 to "Name has already been taken" error when importing Puppet classes
- Category set to Puppet integration

#2 - 08/24/2015 03:02 AM - Dominic Cleal

- Has duplicate Bug #11453: Warning! Validation failed: Name has already been taken added

#3 - 03/23/2016 06:30 PM - Sean O'Keeffe

- Related to Bug #14339: PuppetClassImporter doesn't respect access control or taxonomies added

#4 - 04/20/2016 02:54 AM - Dominic Cleal

- Is duplicate of Bug #10906: Puppet environment import returns 500 because it exists in different organization added

#5 - 04/20/2016 02:55 AM - Dominic Cleal

- Status changed from New to Duplicate

Thanks for the report, we're going to track this under ticket [#10906](#). This appears to be an issue with orgs/locs, where the existing environment isn't assigned to the org/loc that you're currently using - add it to the current org/loc and it should be OK, or perhaps try using Any Context.
