Description		
<p>So I'm trying to find a correlation between my hosts and why only 3/13 show up as "good" within last 60 min on the dashboard even though 10 have green checks within the last 20 minutes. What I found is 3 out of the 10 good systems have no skipped resources, while the rest have a skipped resource. I remember creating http://theforeman.org/issues/930 which was resolved, but maybe the dashboard "good hosts" field was not updated to also ignore skipped resources?</p> <p>http://groups.google.com/group/foreman-users/browse_thread/thread/3844002f1a03b827</p>

fixes #1135 - missing "good" systems with skipped resources in dashboard report

History

#1 - 08/31/2011 12:52 PM - Jacob McCann

Also seems that under the reports drop-down for 'eventful' that systems with only skipped resources are being shown as eventful.

eventful = true:

Host	Last report	Applied	Restarted	Failed	Restart	Failures	Skipped	Config retrieval	Runtime
hostname19	1 minute ago	0	0	0	0		9	3.46	11.22
hostname2f	2 minutes ago	0	0	0	0		9	3.28	9.55
hostname85	3 minutes ago	0	0	2	0		1	5.21	21.24
