

Foreman - Bug #11385

There is no way to manage network interfaces of compute profiles with libvirt if there is no libvirt network

08/17/2015 07:44 AM - Julien Pivotto

Status:	Closed	Fixed in Releases: Found in Releases: 1.8.2 Red Hat JIRA:
Priority:	Normal	
Assignee:		
Category:	Compute resources - libvirt	
Target version:	1.10.0	
Difficulty:	easy	
Triaged:		
Bugzilla link:		
Pull request:	https://github.com/theforeman/foreman/pull/2614	
Description <p>Libvirt allows us to create two kinds of interfaces: physical and nat interfaces. The nat interfaces require 'libvirt networks' to be populated, but the physical interfaces only requires 'libvirt interfaces'.</p> <p>In our setup we delete on the hypervisors the 'virbr0' libvirt network.</p> <p>As a result we see 'No networks found.' where we expect to be able to select the physical interfaces.</p>

@Dominic, it would be nice if this could be integrated for 1.9.1

I have provided 2 PR: <https://github.com/theforeman/foreman/pull/2614> is what we have patched internally but <https://github.com/theforeman/foreman/pull/2615> is a better solution.

Applied in changeset [8c6a7db05bf948aa750e6de560a6c35d23b7791f](#).

#6 - 08/20/2015 01:59 AM - Marek Hulán

- translation missing: en.field_release set to 72
- Pull request <https://github.com/theforeman/foreman/pull/2614> added
- Pull request deleted (<https://github.com/theforeman/foreman/pull/2615>)

As suggested in one of PRs setting to 1.9.1, feel free to postpone if it makes more sense.
