

Foreman - Bug #11403

Allowed vars and helpers are global constants

08/18/2015 07:20 AM - Lukas Zapletal

Status:	Rejected	
Priority:	Normal	
Assignee:	Lukas Zapletal	
Category:	Plugin integration	
Target version:		
Difficulty:	easy	Fixed in Releases:
Triaged:		Found in Releases:
Bugzilla link:		Red Hat JIRA:
Pull request:	https://github.com/theforeman/foreman/pull/2740	
Description		
These are overridden everytime the class is reloaded in development node which causes issues to plugins which adds extra symbols to the arrays. We should have an Plugin API to pull the list of allowed elements rather than adding things into the arrays.
