Description	
<p>"Good Host Reports in the last 60 minutes" is always "0/739 hosts (0%)" even though puppet is running correctly. I'm running Foreman 0.3 and have tested the nightly release, same result. This is not happen with Foreman 0.2 or previous releases. The other stats are reporting correctly. See attached screen shot.</p> <p>I'm running Puppet 2.7.3</p>
