<b>Description</b>		
Detected when used with Date::DAYNAMES which is locked since ruby 1.8.6		
Since <a href="#">#9591 with commit</a> , <a href="#">select_f</a> method is adding the include_blank option on top of the array.		
If the array is locked, this will raise "Can't modify frozen Array" error

Fixes #11437 - do not modify frozen arrays in select\_f helper

#### History

What does this impact precisely? Is it a plugin? I can't see any use of Date::DAYNAMES in Foreman.

It impacts a plugin (though a workaround has been applied), yet it may affect also Foreman core if we'd ever use a frozen array
