

Hammer CLI - Bug #11441

Hammer does not check whether it get correct number of resources when translating name to id parameters

08/20/2015 05:05 AM - Marek Hulán

Description	
When I run hammer like this	
<pre>hammer -d filter create --permissions view_puppetclasses,create_puppetclasses,edit_puppetclasses,destroy_puppetclasses,import_puppetclasses --role demo2</pre>	
hammer searches permissions to get their ids. Since there is not scope search support it get 30 records instead of expected 5 and he sends these permission as parameter_ids. I think we should check that we get expected number of parameters.

- Status changed from New to Closed

- Triaged changed from No to Yes

I wasn't be able to reproduce this issue. Under 'permission_ids' parameter were only 5 (as expected) ids.

Closing this one.
