

Foreman - Bug #11444

Domains page shows negative number of hosts

08/21/2015 08:53 AM - Simon Wydooghe

Status:	Closed	Fixed in Releases: Found in Releases: Red Hat JIRA:
Priority:	Low	
Assignee:	Tomer Brisker	
Category:	Database	
Target version:	1.11.0	
Difficulty:		
Triaged:		
Bugzilla link:		
Pull request:	https://github.com/foreman/foreman/pull/2840	
Description		
<p>I only have one domain. In the Domains page, this one domain shows '-53' hosts. The Environments page shows my two environments with 9 and 167 hosts, which sounds about right. All my hosts are assigned to this one domain.</p> <p>This was the case in 1.8.2, and it remains like this after upgrading to 1.9.0 this morning.</p>

Fixes #11444 - Correctly count hosts in domain

Only hosts that have a primary nic assigned to a domain should be counted in the domain host count. Previous implementation was flawed in that it only updated the counter in certain occasions and not all, leading sometimes to incorrect host counts. I have implemented the counter updates in `after_commit` to reduce chance of deadlocks.

- Related to Bug #5692: Puppet environment counters not updated added

#2 - 08/21/2015 08:58 AM - Dominic Cleal

- Status changed from New to Feedback

Please try running `foreman-rake fix_cached_counters` to recount everything. If it gets out of sync again, please re-open the bug as perhaps one of our fixes for it (in [#5692](#) and related) didn't work. Thanks!

#3 - 08/21/2015 11:39 AM - Simon Wydooghe

That worked! I'll re-open if it happens again. Thanks, Dominic. Enjoy your weekend!
